

## Math 05, Homework 9 on Sections 7.1 - 7.4

---

Write all your working out and answers on your own notepaper - no need to write the questions. Please use lots of space.

It is very important that you show clearly any work you had to do to get your answers. Just writing the answer down with no work shown is not enough. All 18 questions are worth 2 points each.

---

Do these first 10 questions and *check that your answers match the solutions on page 2*. If you don't get the same answers then try to fix them by looking at your notes or the book or asking me. Only do the last eight questions when you are sure you understand the first ten.

  - (2) Factor by finding the greatest common factor (GCF): (a)  $10x + 20$  (b)  $10x^2 + 21$
  - (3) Factor by finding the GCF:  $6x^3 + 15x^2$
  - (4) Factor by finding the GCF:  $14x^3y - 7x^2y - 21xy^2$
  - (5) Factor the differences of squares: (a)  $x^2 - 9^2$  (b)  $81 - 25x^4$
  - (6) Factor:  $x^2 + 100$
  - (7) Factor completely:  $50x^3 - 18x$
  - (8) Factor:  $x^2 + 7x + 10$
