

Can I place out of a remedial math course? Yes!

You may place out of a remedial course by taking the final exam for the course and scoring 70 or higher. **NOTE: Retaking the COMPASS exam does not place out of remedial math courses.**

Here is the procedure:

1. Pick up a review sheet either in the department office in CPH 315 or online:
http://fsw01.bcc.cuny.edu/mathdepartment/Courses/Math/math_courses.htm
2. Practice! The tutorial lab in CPH 303 is available to assist you. The lab also has online materials to help you.
3. When you are confident that you can pass the exam with a 70 or higher, make an appointment with the chairperson of the Mathematics Department by calling (718) 289-5411. Do not make the appointment until you are ready to take the exam!
4. When you meet with the chairperson, you will be asked to demonstrate your knowledge by answering a few questions from the review sheet.
5. If you successfully demonstrate your ability to pass the exam, the chairperson will arrange for you to sit for the exam—possibly as soon as your appointment date. When you make your appointment, be sure you are ready to take the exam!
6. If you score 70 or higher on the exam, you will be given a placement slip to register for the next math course in your sequence. The chairperson may have to help you register.
7. You may only attempt the final exam ONE TIME. If you do not score 70 or higher, you must take the appropriate remedial class.
