

MTH 34, Homework 3 on section 2.6

These questions on exact equations will not be collected, but it's a good idea to do them:

page 101, questions 1-13 odd

Check your answers match the solutions in the back of the book.

If you understand the homework questions then you will be able to do the exam questions. You should also try the other questions listed on the syllabus to get extra practice. For any difficulties with the homework, please talk to me after class, come to my office hours or try the Math Tutorial Lab: CP 303.
