

Kerry Ojakian's CSI 33 Class
Due Date: Tuesday September 15

HW #1

General Instructions:

- Homework must be put in a your dropbox folder by the deadline. Follow the dropbox format for the homework. Follow instructions exactly (in particular if a question asks you to name an object in a particular way, please do so, including the use of upper and lower case).
- Remember that you must not copy.

The Assignment

1. Finish Class Assignment 2 on Nim (just put into one of your Drive folders and tell me which one to look in)
2. Modify the 2-gram model from class to make it an N-gram model (this is short!). Then experiment with it by trying your own text (not the shakespeare from class) and try N values larger than 2.

Clearly document your results with readable explanations of what you are doing.
