

## Group Work #14

Kerry Ojakian's MTH 30 Class

Name (first and last):

### The Assignment

- SIMULATION: SPREAD OF RUMOR OR DISEASE

To start, if YES is written in round 0, do nothing; otherwise write NO in round 0. On each round, walk around the room till the instructor says "Stop". At that point, get into pairs and look at just each other's paper. If there is a YES anywhere on the other person's paper, enter a YES on your card in the current round. If you have a YES in any of your earlier rounds, enter a YES on your card in the current round. Otherwise (if all they have is NO's and all you have is NO's), enter a NO on your card in the current round. You should never pair up with someone more than once.
