

Bronx Community College
Department of Mathematics and Computer Science
CSI33 Fall 2019
Programming Assignment 1: worth 20 points
Assigned on September 9, 2019
Due on September 16, 2019

Assignment 1:

Complete the implementation of the Dataset ADT that we started in class on 9/5/2019.

Also write a test suite for your Dataset using the Python unittest module.

The completed assignment will have three files – the Dataset ADT file, the unittest class file, and the results from the Python shell showing that your Dataset passes all the test. Submit them to me by email at sharon.persinger@bcc.cuny.edu by the end of the day on 9/16/2019. The subject line of your email should be CSI33 Assignment 1. Please be sure to include your name in both program files as a comment.
