Bronx Community College
Department of Mathematics and Computer Science
CSI31 Fall 2018

Programming Assignment 5: worth 25 points
Assigned on November 12, 2018
Due on November 19, 2018

Assignment 5:

Students are assigned to the Freshman, Sophomore, Junior, or Senior class according to the number of credits earned. Some universities use the credit levels in this table:

Number of credits	Class
Between 0 and 27, inclusive	Freshman
Between 28 and 55, inclusive	Sophomore
Between 56 and 87, inclusive	Junior
88 or more	Senior

Write a program that gets as input from the user the name of a students and the number of credits that student has completed. You can assume that the number of credits is not negative. Then the program should print a sentence with the student's name and the class the student belongs to. Be sure the output is a complete sentence, like "Luis Torres is a Sophomore."

Submit your program file and a file with the results of testing your program by email to me at prof.persinger@gmail.com by midnight on November 19, 2018.
